45-7 Handy, 3-jaw industrial puller with power-transmitting and 3-jaw selfcentering jaws

DESCRIPTION

The handy, 3-jaw industrial puller with power-transmitting and selfcentering jaws is used for pulling bearings, gears and washers in all common sizes for trade, workshop and industry. It can be used to remove any component that sits on a shaft and is freely accessible from the outside. When the spindle pressure is built up, the jaws connected to each other grip the part to be pulled tighter and tighter. The 3-jaw design guarantees even load distribution and therefore a particularly secure hold on the part to be removed.

APPLICATION AREA

For pulling off bearings, gears and pulleys

BENEFIT

- Self-centering of the legs by manually tightening the Spindle (Autogrip Technology)
- Secure positioning of the Spindle thanks to the rotatable spindle tip, both on smooth surfaces and when centering (Switch Technology)
- 3-jaw design ensures even force distribution and enables greater pulling power
- Anti-slip guard on the spindle head for safe working with wrench
- Spindle riser protects the threading

OPERATION

- Place the puller leg on the part to be removed from the outside
- Swivel the claws under the component
- Pull the spindle manually under pressure to fix it
- Move the hexagon on the spindle head with a ratchet or combination wrench until the component is released

MASTER DATA

GTIN [EAN]	4021176821646
Country of origin	DE
Case material	Tool steel
Series	45
Gross weight [kg]	15,75 kg
Package contents	1 piece
Packaging Act	PAP 21
Global sales capability given	Yes

SPARE PARTS

- 45-4-T_Traverse
- 45-7-350-S_3 Hook (Set)
- 45-7-206_Spindle with bushing
- 633370_Two-sided spindle tip

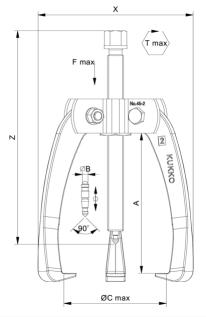

APPLICATION IMAGE

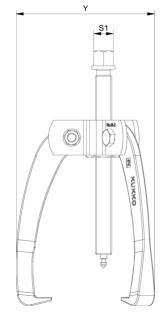

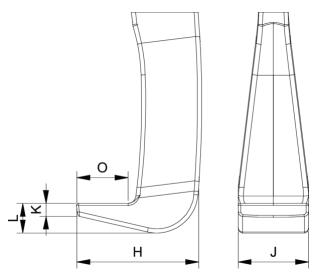

Handy, 3-jaw industrial puller with powertransmitting and 3-jaw self-centering jaws

Abbreviati	onAttribut	Wert
Х	Total width [mm]	370 mm
Υ	Total depth [mm]	370 mm
